Testimonials

The product itself is fine, it looks good, and it does the job.
For the price, it's a great deal.

The company is a pleasure to do business with. When I realized I'd ordered the wrong one I panicked and wondered how much it would cost me to get the r ...

Range Hood Decibel Levels

ZLINE Range Hoods are supposed to be seen, not heard. That's why even at the highest speed our range hoods only reach 56 decibels, which is quieter than your average conversation. Rest assured that your new range hood will not be interrupting your dinner party or when you're helping with homework.

Good performance and quality construction

Overall good product and well made. Needs an additional light in the center since the 2 lights provided are not enough. Also, I was not aware that there were fixtures for warming lights. The available warming bulbs are too large, stick down too far, so we are replacing with smaller led lights and a glass sheet to cover the holes

Yes, I recommend this product.

Great fan, terrible lighting

Fan works amazing. Factory LED lighting is terrible. Install standard PAR 38 bulbs in the heat lamp sockets to provide adequate lighting to cook under.

No, I do not recommend this product.

Excellent Exhaust

The product came through well packed. The pictures of the filters are not the same as the actual filter, but they work fine. My exhaust (the same size as vent from fan) is straight up through the roof about 10 ft. I thought this would make the fan quieter, but it is still noisy even on the quiet setting. The "buzzer" that is sounded after each change is loud and annoying. Wish it could be turned off. The shutoff timer is great and its nice to be able to set it for as long as 60 minutes. Installation is also easy.

Yes, I recommend this product.

Well Built, Super Quiet, Easy to Clean & Install

I bought this range hood over a year ago. The first one that was shipped had an issue with the fan rubbing the housing. ZLine sent me a replacement within a week and I have not had any issue with it since. It is a well built and very quiet hood. Even with the fan on the highest setting, two people can stand in front of the hood and have a conversation with having to talk over the fan. When the fan is on low, which move something like 400 CFM you can barely hear it.

Yes, I recommend this product.

Super quiet, yet powerful

We purchased this when remodeling our kitchen last year. We love it's sleek look and it is very powerful and extremely quiet. No more smoke detectors going off in our house! The only downside is the LEAD lighting with a wierd blue tint

Yes, I recommend this product.

Satisfied customer

Product is still relatively new, but have found it to work well, has great features, and is attractive. It is being used on a grilling deck(covered) and must keep up with heavy grilling smoke. So far, so good. Good value, as well.

Yes, I recommend this product.

Love the look and functionality!

I really like the different lights I can use. Also it isn't loud like my last vent hood. It's a great design.

Yes, I recommend this product.
