Description:

The KDTM404ESS opts for wash water filtering with its exclusive Clean Water wash system, developed to regularly remove food particles from the water, while it is available in a rare black stainless-steel finish (KDTM404EBS) -- the majority of black-colored dishwashers come in a less-appealing plastic exterior. That being said, it dedicates two concentrated water jets to the upper rack with its ProScrub Upper feature, which KitchenAid states will provide 39% better water coverage for utensils placed in the top rack.

Also known as KitchenAid KDTM404EBS,KitchenAid KDTM404EWH, KitchenAid KDTM404EBL,.
